

## What's New in Relativity 9.5

This updated version of Relativity 9.5 introduces new quality of life enhancements to make viewing your data easier, and more refined. Significant improvements have been made to the HTML viewer, making it faster and more feature-rich than ever before.

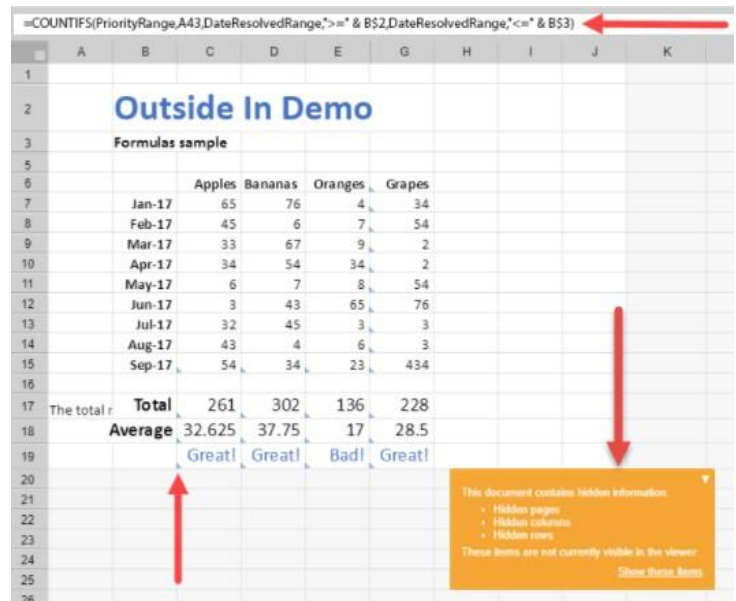

### HTML Viewer Enhancements

Key Features include:

- Email header improvements
  - File attachments appear with their appropriate icons
  - You can collapse email lists by clicking the arrow icon next to the From field.
  - You can open and close recipient email addresses in the header.

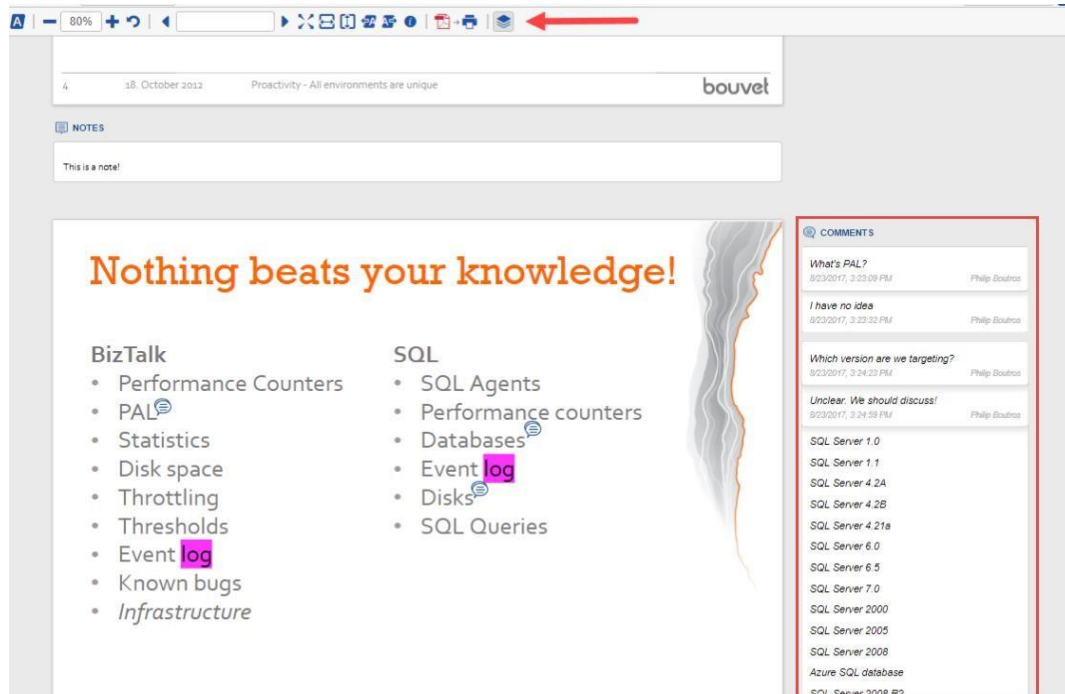

- Excel formulas are small blue tick marks in the lower left corner of each cell. Formulas also display in the preview row above the spreadsheet within the viewer.
- Notifications display when the following items are found in the document:
  - Hidden slides
  - Hidden rows
  - Hidden columns
  - Speaker notes
  - Comments
  - Tracked Changes

For Limited Distribution, Only - Proprietary and Confidential Work Product.

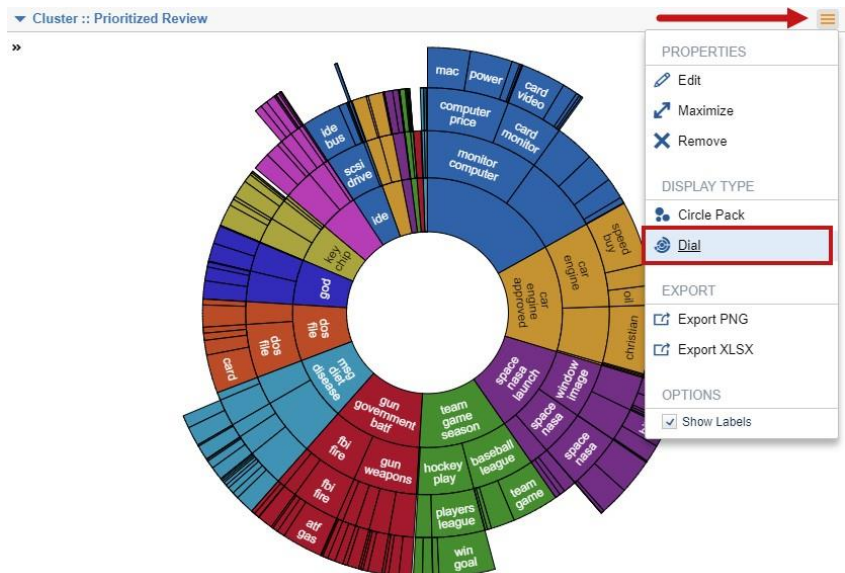

## What's New in Relativity 9.5

- Power Point speaker notes and comments can now be shown next to the slide they appear on.

### Other Enhancements

- Relativity Analytics now offers the dial visualization in parallel with the existing circle pack and nearby cluster visualizations. The dial enables you to view clusters across all cluster depth levels.
- You can now enable filtering of saved searches by the Created By, Created On, Last Modified By, Last Modified On, Owner, Keywords, and Notes fields.
- A new, more performant ActiveX viewer is required for this version of Relativity. **Those using ActiveX will be required to update their computers to Microsoft .NET 4.6.2, prior to installing the new viewer. Both of these components will be made available through Discovia.**

For Limited Distribution, Only - Proprietary and Confidential Work Product.
